Datasheet

Uniblitz® #134

Post Mount Adapter

Overview

The #134 post mount adapter mounts TS, NS and DSS series shutters to a 1/4-20 threaded post mount.

It is simple to use: secure the shutter with the two nylon-tipped set screws, and attach it to any post mount with a 1/4-20 thread.

Caution: Let the mount hold the shutter in place, but do not overtighten the nylon-tipped set screws. Overtightening can cause irreparable damage to the shutter.

Key features

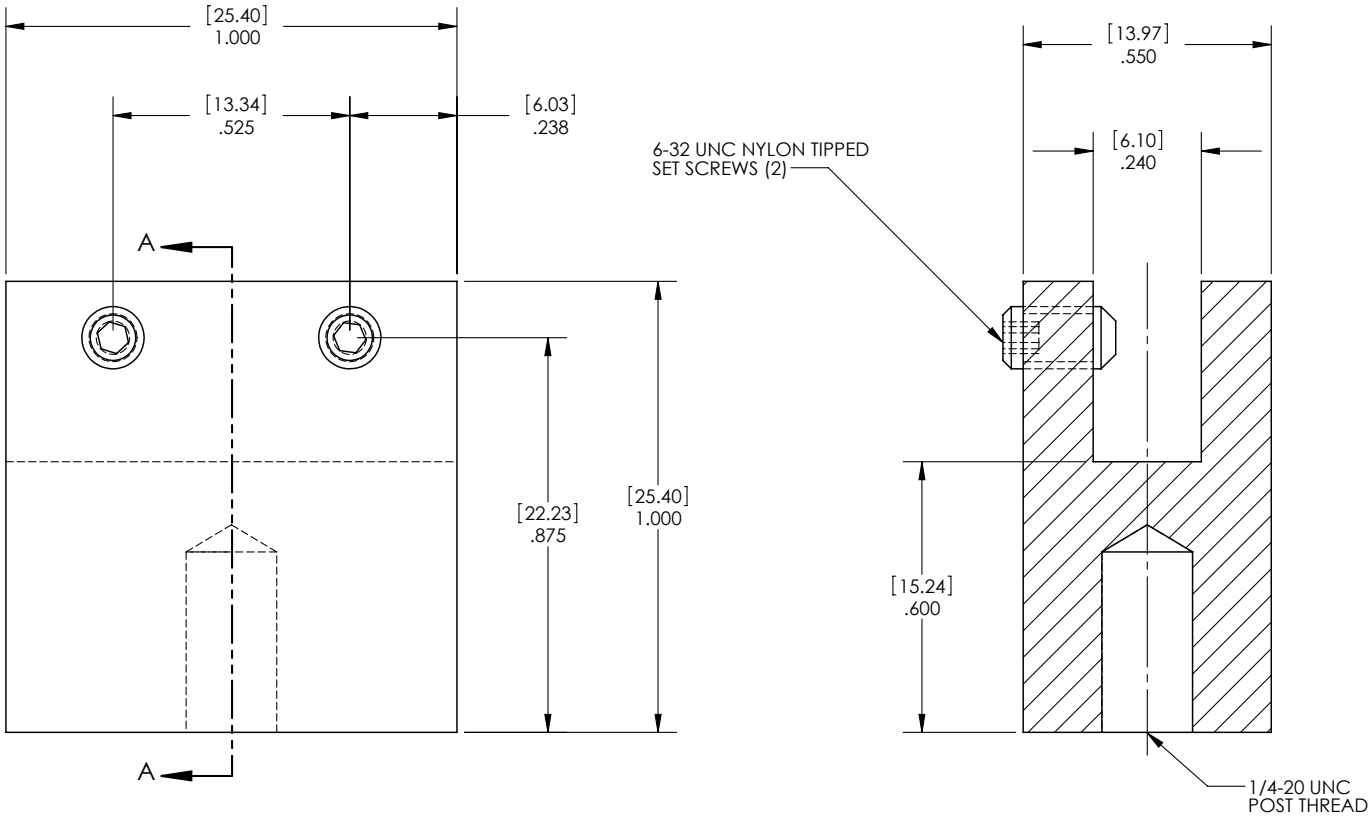

- Mounts TS, NS and DSS shutters to a 1/4-20 post
- Two nylon-tipped set screws hold the shutter

Specifications

Mount	
Post thread	1/4-20 UNC
Set screws	Two 6-32 UNC, nylon-tipped
